

Security & Anti-fake Label

Security & Anti-fake Label

For security and anti-fake label, we offer a full range of materials, colors, with overt and covert security to ensure that the solution you need is supplied at a cost effective price. Features such as tamper evident materials, UV inks, overt micro-embossed holographic images, consecutive numbering and thermo-chromic inks can be combined to produce some very secure brand protection labels without very high origination costs. Brand protection is not just putting a hologram on the product!

Types of master origination of Anti-fake Label
